

How can we Count number of tags present on a html page in groups ?

Following website allows you to do so

You have to paste or write html code in a box and it will count number of tags on the html page

like how many a tags, br tags, p tags, table tags etc

Following is the link to the webpage

[HTML Tag Count \(redwriteblue.com\)](http://redwriteblue.com)

Following is the screenshot

Paste the contents of an HTML or XHTML file here:

```
<html>
<head>
<title>Page 1</title>
</head>
<body>
<a href='home/'>Home Page</a>
<br>
<a href='about/'>About Page</a>
<br>
<a href='contact/'>Contact Us Page</a>
<br>
</body>
</html>
```

Count Tags

Tag Name	Open	Close
a	3	3
body	1	1
br	3	0
head	1	1
html	1	1
title	1	1
