

How to share your files on internet

Following are the softwares to share your files on internet

- Drop Box
- Google Drive

If you want to send a file to a user on internet or a group of users you can upload file to drop box or google drive and then you can send a link to that file to a user and he can download that file.

Dropbox is available at www.dropbox.com

Google drive is available at <https://drive.google.com>
