

What is gcc?

gcc is a GNU C Compiler.

Command to compile a c program

`gcc hello.c`

Command to run a c program

`./hello.out`

Following is the hello.c file

```
#include"stdio.h"

int main()
{
    printf("Hello World");
    return 1;
}
```

stdio.h is the header file and it should be present in the same directory as of hello.c file.

Output of the above program will be

Hello World
