

## What is Borland Turbo C++ 3.0 ?

Borland Turbo C++ 3.0 is an Integrated Development Environment (IDE) for C and C++ and it runs on Dos.

To run Borland Turbo C++ 3.0 on Windows 7 or higher you can use DOSBOX which can be downloaded from [www.dosbox.com](http://www.dosbox.com)

Borland Turbo C++ 3.0 can be downloaded from <http://www.cppcourses.com/software/tc.zip>

After installing dosbox

to run Borland Turbo C++ 3.0 on Windows 11 follow these commands

```
start dosbox
```

---

```
mount h: c:\tc
```

```
h:
```

```
cd bin
```

```
tc
```

---

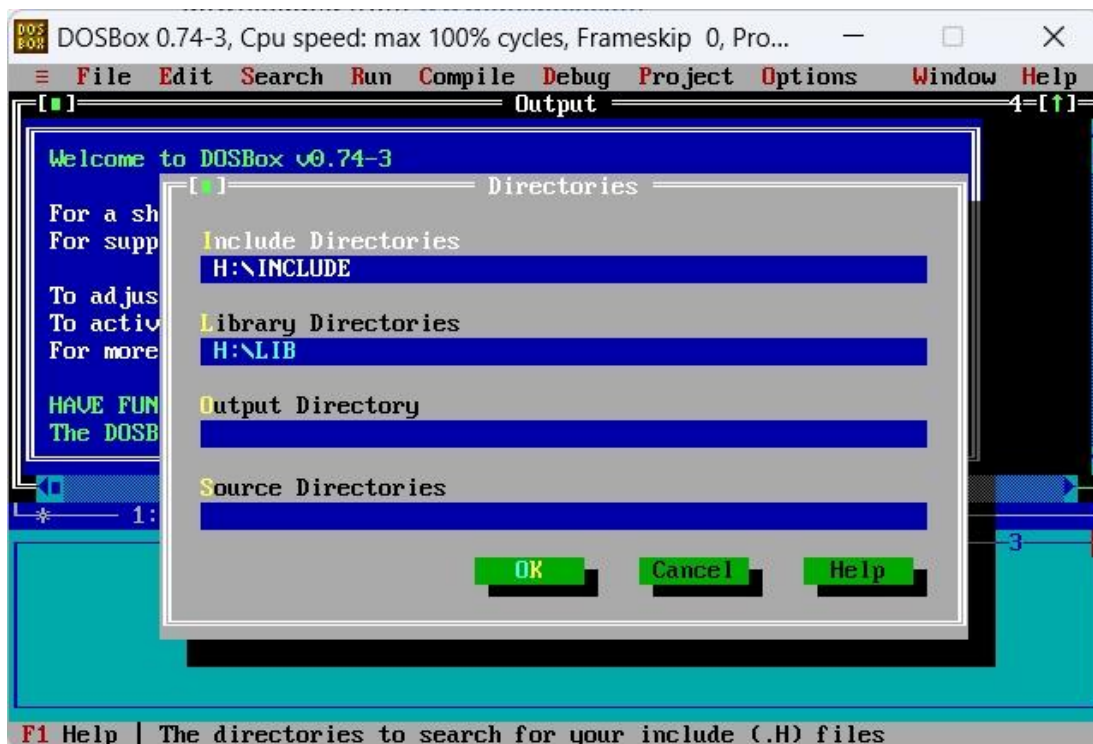

Now go to options and directories change Directories for include and lib folder as

```
h:\include
```

and

```
h:\lib
```

Following is the screen shot

Now run your first program as

---

```
#include<iostream.h>

void main()

{

cout<<"Hello World";

}
```

---

Save this program as prg1.cpp and run it

you will get output as

Hello World
