

How to shorten a Long URL in a short Link?

For example you have a very long link like

<http://www.cppcourses.com/directory1/directory2/directory3/page1.html>

and you want to shorten this link when you have send this link in a SMS.

So tinyurl.com can be used for this purpose

Tinyurl.com receives a long link and can convert long link to shorter link

You can also create QR Code for a tinyurl link

Website for tinyurl is <http://www.tinyurl.com>

The screenshot shows the TinyURL website interface. At the top, the 'TINYURL' logo is displayed in white on a dark blue background. Below the logo, there is a white rounded rectangle containing the following elements:

- A link icon followed by the text 'Your Long URL'.
- A text input field containing the long URL: <http://www.cppcourses.com/directory>.
- A pencil icon followed by the text 'TinyURL'.
- A text input field containing the shortened URL: <https://tinyurl.com/depage1>.
- A row of four buttons: a circular arrow icon, a QR code icon labeled 'QR', a share icon labeled 'Share', and a copy icon labeled 'Copy'.
- At the bottom, two buttons: 'My URLs' and 'Shorten another'.

When you will point your web browser to <https://tinyurl.com/depage1> browser will point to

<http://www.cppcourses.com/directory1/directory2/directory3/page1.html>
