ChatGPT Tutorial

Raman Deep Singh

ChatGPT is a website and also available as a desktop software which can be used to search for your answers.

For Example if you want to write an email for inviting your friend on your birthday.

You can open www.chatgpt.com

And write "write email to invite friend on my birthday"

And ChatGPT will give you an email message to invite your friend on your birthday

As shown below

Subject: You're Invited to My Birthday Party!

Hi [Friend's Name],

I hope this message finds you well! I'm excited to share that my birthday is coming up, and I'd love for you to join me in celebrating.

Date: [Your Birthday Date]
Time: [Start Time]
Location: [Party Location]
RSVP: [RSVP Deadline]

There will be plenty of food, drinks, music, and games, and it wouldn't be the same without you there. I really hope you can make it!

Please let me know if you can come by [RSVP Deadline] so I can plan accordingly.

Looking forward to celebrating with you!

Best,
[Your Name]

ChatGPT can also help you find code for the programming languages like Java, C++, Python

You can write in ChatGPT Like

Java code to check whether a number is prime or not

Then ChatGPT will give you the source code as well as explanation of the code

---

ChatGPT also interacts with the user through Prompts
